Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Rocket Lab USA, Inc. (including its consolidated subsidiaries, the "Company") is filing this Form SD pursuant to Rule 13p-1 under the Securities Exchange Act of 1934 for the reporting period from January 1, 2023 to December 31, 2023 (the "Reporting Period").

For the Reporting Period, the Company conducted, in good faith, a reasonable country of origin inquiry ("RCOI") regarding the conflict minerals (as defined in Item 1.01(d)(3) of Form SD), that are necessary to the functionality or production of products that the Company manufactures or contracts to manufacture (the "Minerals"). The inquiry was reasonably designed to determine if the Minerals originated in the Democratic Republic of the Congo or an adjoining country (the "Covered Countries") or are from recycled or scrap sources.

Conflict Minerals Disclosure

Based on the results of our RCOI, we have reason to believe that certain Minerals contained in our products for the Reporting Period may have originated in the Covered Countries and may not have been from recycled or scrap sources. We therefore conducted due diligence on the source and chain of custody of these Minerals and prepared a Conflict Minerals Report. A copy of the Company's Conflict Minerals Report for the Reporting Period is publicly available at https://investors.rocketlabusa.com.

Item 1.02 Exhibit

The Company's Conflict Minerals Report for the Reporting Period is filed as Exhibit 1.01 hereto.

Section 2 - Resource Extraction Issuer Disclosure

Item 2.01 Resource Extraction Issuer Disclosure and Report

Not Applicable.

Section 3 - Exhibits

Item 3.01 Exhibits

List below the following exhibit filed as part of this report.

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.

ROCKET LAB USA, INC.

Date: May 31, 2024 By: /s/ Arjun Kampani

Arjun Kampani

Senior Vice President, General Counsel and Corporate Secretary

Rocket Lab USA Conflict Minerals Report for the Year Ended December 31, 2023

Introduction

Rocket Lab USA, Inc., on behalf of itself and its subsidiaries, is a Delaware corporation with its headquarters located at 3881 McGowen St, Long Beach, CA, US, 90808-1702 (also referred to as "Rocket Lab," "the Company," "we," "our," and "us") is an end-to-end space company delivering reliable launch services, spacecraft, satellite components, and on-orbit management.

This Conflict Minerals Report ("CMR") for the year ended December 31, 2023, is presented to comply with Rule 13p-1 under the Securities Exchange Act of 1934 (the "Rule"). The Rule imposes certain reporting obligations on U.S. Securities and Exchange Commission ("SEC") issuers whose manufactured products contain certain minerals which are necessary to the functionality or production of their products. These minerals are cassiterite, columbite- tantalite (coltan), gold, wolframite, and their derivatives, which are limited to tin, tantalum and tungsten ("3TG" or "Conflict Minerals"). The Rule focuses on 3TG originating from the Democratic Republic of Congo ("DRC") region and nine adjoining countries (together, the "Covered Countries").

This CMR relates to the process undertaken for Rocket Lab products that were manufactured, or contracted to be manufactured, during calendar year 2023 and that contain Conflict Minerals.

Executive Summary

We performed a Reasonable Country of Origin Inquiry ("RCOI") on suppliers we believe provided materials or components containing 3TGs necessary to the manufacturing of our products during calendar year 2023. Our suppliers identified 352 valid smelters and refineries ("Smelters"). Of these 352 Smelters, we identified 53 as sourcing (or there was a reason to believe they may be sourcing) from the Covered Countries. Our due diligence review indicated that 38 of these Smelters have been audited and recognized as conformant to the Responsible Minerals Assurance Process ("RMAP"). The remaining 15 Smelters potentially sourcing from the Covered Countries were subject to our risk mitigation process which is in accordance with the OECD Due Diligence Guidance for Responsible Supply Chain of Minerals from Conflict-Affected and High-Risk Areas (the "OECD Guidance").

Company Management Systems

Rocket Lab established strong management systems based on Step 1 of the OECD Guidance.

- Step 1A Adopt, and clearly communicate to suppliers and the public, a company policy for the supply chain of minerals originating from conflict-affected and high-risk areas. We adopted a conflict minerals policy that is publicly available at the link provided below.

 https://www.rocketlabusa.com/terms-and-conditions
- Step 1B Structure internal management to support supply chain due diligence. We maintain a cross-functional internal team to support our supply chain due diligence efforts. These efforts are overseen by the Director of Central Procurement.
- Step 1C <u>Establish a system of transparency, information collection and control over the supply chain.</u> We implemented a detailed process to collect required supplier and smelter RCOI and due diligence data. Full details on the supply chain data gathering are included in the RCOI and due diligence sections of this Report.
- Step 1D <u>Strengthen company engagement with suppliers</u>. We engage directly with suppliers during the RCOI process. We have also implemented a plan to improve the quantity and quality of supplier and smelter responses year-over-year.
- Step 1E <u>Establish a company level grievance mechanism</u>. We have an established an internal whistleblower policy and anonymous reporting system that allows employees to voice concerns about suspected violations of our Conflict Minerals Policy.

Reasonable Country of Origin Inquiry (RCOI)

We designed our RCOI process in accordance with Step 2A and 2B of the OECD Guidance. Our RCOI process involved two stages:

- Stage 1 Supplier RCOI (Step 2A of the OECD Guidance)
- Stage 2 Smelter RCOI (Step 2B of the OECD Guidance)

For the 2023 reporting period, Rocket Lab's RCOI process was executed by Claigan Environmental Inc. ("Claigan").

Supplier RCOI

We designed our supplier RCOI process to identify the smelters in our supply chain. Our supplier RCOI process for the 2023 reporting period included:

- developing a list of suppliers providing 3TG containing components;
- · contacting each supplier and requesting Conflict Minerals data using the industry-standard Conflict Minerals Reporting Template ("CMRT")
- reviewing supplier responses for accuracy and completeness;
- aggregating supplier-provided smelters into a single unique list of smelters meeting the definition of a smelter under one of three industry-recognized audit
 protocols; and
- reviewing the final smelter list (and compared it to industry peers) to determine if we reasonably identified all the smelters in our supply chain.

Through the supplier RCOI process we identified 352 Smelters in our supply chain.

Smelter RCOI

Due to the overlap between smelter RCOI and smelter due diligence, the smelter RCOI process is summarized in the due diligence section of this report.

Due Diligence

Rocket Lab's Due Diligence Process was designed in accordance with the applicable sections of Steps 2, 3, and 4 of the OECD Guidance. For the 2023 reporting period, Rocket Lab's smelter RCOI and Due Diligence process were executed by Claigan.

Smelter RCOI and Due Diligence

Rocket Lab's smelter RCOI and due diligence processes were designed to meet the criteria of Step 2 of the OECD Guidance.

We engaged with each smelter identified in our supply chain to determine whether or not they sourced from the Covered Countries. For smelters that confirmed, either directly or through industry associations, that they did not source from the Covered Countries but who were not recognized as conformant to the RMAP, we reviewed publicly available information to determine whether there was any contrary evidence that contradicted the smelter's declaration. In doing so we reviewed sources such as NGO publications, including Global Witness, SWISSAID, Le Congo N'est Pas a Vendre, The Business and Human Rights Resource Centre, and Radio Okapi. We also consulted the most recent United Nations Group of Experts reports on the DRC and performed public internet searches.

If smelters did not respond to our inquiry, we reviewed the same publicly available sources to determine whether there was reason to believe the smelter may have sourced from the Covered Countries during the reporting period.

We categorize smelters that are sourcing (or that we have reason to believe may be sourcing) from the Covered Countries and not currently RMAP Conformant as high-risk. We expect that all high risk smelters be audited and recognized as conformant with RMAP or be working towards such designation. If any high risk smelters are not recognized as conformant with RMAP, we conduct the risk mitigation procedures described below on all high risk smelters.

Our suppliers identified 352 unique smelters, of which 53 smelters source, or there is a reason to believe they may source, from the Covered Countries. We determined that 38 of these 53 smelters have been audited and recognized as conformant to the RMAP. We conducted risk mitigation on the remaining 15 smelters.

Risk Mitigation

Rocket Lab conducted risk mitigation on 15 Smelters that were not recognized as conformant to the RMAP and were sourcing (or there is a reason to believe they may be sourcing) from the Covered Countries. Rocket Lab's risk mitigation was designed in accordance with Step 3B of the OECD Guidance and was reported to the General Counsel in accordance with Step 3A of the OECD Guidance.

As part of our risk mitigation process, we performed additional due diligence to determine if there was any reason to believe the smelters directly or indirectly financed or benefited armed groups in the Covered Countries.

We did not require the removal of smelters if there was no reason to believe they were directly or indirectly financing or benefitting armed groups in the Covered Countries. These smelters are scheduled to be re-visited in the 2024 reporting period.

Improvement Plan

Rocket Lab is committed to continuous improvement in our due diligence process to further mitigate the risk that the 3TG materials in our products could directly or indirectly benefit or finance armed groups in the Covered Countries. We will strive to continuously improve our efforts to educate our suppliers, to increase supplier response rates and improve the timeliness, accuracy and comprehensiveness of the supplier survey responses we receive.

Additionally, we seek to enhance our efforts to encourage our suppliers to source from RMAP conformant smelters when sourcing material from the Covered Countries, and will continue outreach efforts with suppliers who listed OFAC-sanctioned smelters in their CMRT to have these smelters removed or confirmed that they are not part of their supply chain for the Company's products.

Smelter denoted with an (*) has been sanctioned by the U.S. Department of the Treasury's Office of Foreign Assets Control, and was reported by certain suppliers as potentially in their supply chains. Suppliers generally report at a company-wide level and at the time of reporting none of the suppliers have confirmed the presence of an OFAC sanctioned entity in the parts supplied to Rocket Lab. Rocket Lab has no direct business with this Smelter, and certain suppliers reporting such Smelter are unable to confirm whether or not such Smelter was used in the Company's products. The Company has escalated its supply chain risk mitigation efforts on these suppliers, and as a result, several of such suppliers removed the applicable Smelter from their supply chain. This escalation process remains in progress.

Fifty-three of the 352 unique Smelters identified during our RCOI either declared that they were sourcing, or there was reason to believe were sourcing, from the Covered Countries. Based on the Smelters' disclosures and the publicly available information, we have reason to believe these Smelters may be sourcing from the following Covered Countries: The DRC, Burundi, Rwanda, Tanzania, and Uganda. Our due diligence review indicated that 38 of the 53 Smelters have been audited and recognized as conformant to the RMAP.

Additional Risk Factors

The statements included in this Conflict Minerals Report are based on the RCOI process and due diligence performed in good faith by Rocket Lab. These statements are based on the information available at the time. A number of factors could introduce errors or otherwise affect the accuracy of these statements.

These factors include, but are not limited to: (i) gaps in supplier or smelter data, (ii) errors or omissions by suppliers or smelters, (iii) uncertainty or varied interpretations of the disclosure requirements described in the SEC final rules, (iv) all instances of conflict minerals necessary to the functionality or manufacturing of our products may not have been reported correctly by our suppliers, (v) some suppliers and smelters are unfamiliar with the diligence process and information required to be provided, which could lead to inaccurate or incomplete responses, (vi) timeliness of data received from our suppliers, (vii) information that is in the public domain may not be discovered despite having conducted a reasonable search, (viii) there may be errors in publicly available information, (ix) language barriers or errors in translation could lead to inaccurate information, (x) there could be oversights or errors in conflict free smelter audits, (xi) materials sourced from the Covered Countries could be inaccurately declared as sourced from outside the Covered Countries, (xii) illegally tagged Conflict Minerals could be introduced into the supply chain without our knowledge or the knowledge of our suppliers, (xiii) difficulties obtaining information from companies that are no longer in business, and (xiv) smuggling of Conflict Minerals outside the Covered Countries may make identification of their origin more difficult.

This Specialized Disclosure Report on Form SD, including this Conflict Minerals Report filed as Exhibit 1.01 thereto, contains forward looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements include any plans or intentions to improve the number and quality of supplier and smelter response rates and steps we intend to take to mitigate risk in our supply chain. These forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected. In particular, the Company's risk mitigation and improvement plans may be affected by: (a) changes in global regulations related to the extraction of and disclosure obligations related to Conflict Minerals; (b) the ability of our suppliers and smelters to provide accurate information in response to our requests; (c) the availability of alternate sources of materials necessary to the functionality or production of our products on commercially reasonable terms or at all; (d) the ability of certified smelters to meet demand for raw materials; and (e) limits on our ability to unilaterally influence supplier behavior. These forward-looking statements are made as of the date hereof and we assume no obligation to update such statements.
